# Next Generation Sequencing

#### NGS Solutions to Advance Your Research

#### **Amplicon Sequencing**

- Amplicon-EZ
- Short-read amplicons for >100bp
- Long-read amplicons for >500bp

#### RNA Sequencing (RNA-Seq)

- Standard and strand-specific for mRNA and total RNA
- Small RNA
- Ultra-low input
- Iso-Seq
- High-throughput gene expression screening
- Single-cell

#### Whole Genome Sequencing (WGS)

- Short- and long-read
- Low-pass

#### **Targeted Sequencing**

- Whole exome
- Cancer and custom gene panels
- CRISPR validation assay

 CLIA whole genome and exome

Clinical Sequencing

 RUO assays in CLIA environment

#### Viral Genome Sequencing

- AAV, lentivirus, and more
- RNA and DNA viruses

#### Epigenomics

- Short- and long-read whole genome
- Methyl-Seq
- Single-cell and bulk ATAC-Seq
- ChIP-Seq

#### Immunogenomics

- Bulk and single-cell immune repertoire profiling
- Precision Antibody Discovery

#### Metagenomics

- Whole genome
- 16S assay for bacterial ID
- ITS2 assay for fungal ID
- Microbe-EZ (Europe only)

#### **Proteomics and Spatial Genomics**

- Digital spatial profiling
- Olink® proteomics

# **Next Generation Sequencing**

#### The Azenta Life Sciences Difference

- Experience processing over 100 sample types including complex, novel, and less-than-ideal samples.
- Continuous optimization of solutions through increased automation and platform offerings.
- One of the industry's highest on-time delivery rates with over 92% of projects delivered on time.
- Expertise sequencing a variety of organisms with over 200 species sequenced.

#### **Quality Through Every Step**

Sample Sourcing

Access to an extensive biorepository

Design

Free consultations from expert

#### Extraction

Myriad of sample types accepted

#### Library Prep

Automated processes improve reproducibility

#### Sequencing

Utilizing the latest platforms and technologies

### Bioinformatics

Customizable offerings based on your needs

### Flexible Package Options

Though our turnaround times already exceed industry standards, sometimes you need results quicker. We offer flexible service packages to accommodate your project deadlines while providing the same high-quality data you know and trust from Azenta Life Sciences.

#### Value

Come in under budget with our most economical pricing

#### Preferred

Get results quickly without breaking the bank

#### Express

Meet tight deadlines with our industryleading turnaround time

#### Lightning

Receive results in lightning speed for select RNA sequencing and sequencing-only services

#### **NGS Platforms**
